

Revisions: ORNITH-APP-24-135

Dear Dr. Szabo,

We would like to thank the editorial team and two new reviewers for their further comments and suggestions on “Low migratory flight altitudes may explain increased collision risk for American Woodcock”. We have addressed those comments in the attached document and incorporated them into a new version of the manuscript. In addition to improving the clarity of the paper, our changes provide additional context (such as sample sizes and a map of flight locations) which we believe will aid the reader in interpreting our results. Thank you for your continued consideration of this manuscript; please contact me at (703) 888-8284 or at liamaberigan@gmail.com if you have any questions regarding this submission. We look forward to hearing from you.

Sincerely,

Dr. Liam Berigan
